# 2020

HAPPY NEW YEAR

Let start the new decade with a conversation about when the decade ends/begins. We all agree the New Year started January 1st.

Some people think it stated January 1, 2020 and other think the decade ends December 31, 2020.

The difference is if you use the ordinal or cardinal method of counting.

Ordinal counts the decade from year ending in 1 making 2011 through 2020 would be the decade. Cardinal counting groups decades by the years with the same number in the tens place of the number making the decade 2010 through 2019 the decade.

A YouGov poll was conducted on December 2, 2019, asking 13,582 Americans whether the following decade would begin on New Year's Day 2020 or New Year's Day 2021. Results show that 64% of Americans answered the next decade will begin on January 1, 2020, and will end on December 31, 2029. 19% of the Americans surveyed replied they are unsure, while 17% answered the next decade will begin on January 1, 2021, and will end on December 31, 2030.

Whatever way you decide it count the decade make 2020 a great year.
